PROJECTS

Headbook (*Rails, Backbone*) | [live](#) | [github](#)

- Full stack Facebook clone with a Backbone front-end and Rails back-end
- Enabled user manipulation of associations through jQuery drag-and-drop
- Styled using Bootstrap for a responsive website experience
- Utilized Paperclip to capture photo upload and store on AWS bucket

Snakes (*Javascript*) | [live](#) | [github](#)

- Simplified javascript version of the popular snake game
- Customized Keymaster to allow easy user action

MegaRecord (*Javascript*) | [github](#)

- Clone of popular ActiveRecord ORM features
- Created mass assignment, associations, and querying methods through Ruby meta programming

SKILLS

Ruby, Rails, JavaScript, Backbone.js, jQuery, Git, SQL, HTML, CSS, TDD

EXPERIENCE

Senior Quantitative Research Analyst – *AcumenLLC* (Spring 2011 – Winter 2013)

Analyzed terabytes of Medicare claims in conjunction with relational databases to identify healthcare fraud, waste, and abuse

Derivatives Analyst – *GHF Investment Consulting* (Summer 2009 – Spring 2010)

Implemented various trading strategies using Outrights, Spreads, and Butterflies aimed to maximize profits and reduce risk

Business Analyst – *Macquarie Bank* (Summer 2008)

Developed a valuation model for a potential multi-billion dollar transaction that included detailed quarterly analyses of operations, debt, tax, and cash flows in a business for a time-horizon of 20 years.

EDUCATION

Bachelors of Business Administration

University of Michigan, 2008

Coursework: Calculus (Multivariate and ODE), Linear Algebra, Asset Allocation and Portfolio Optimization
